

WHAT DO YOU NEED?

1 plastic milk bottle (empty)
1/3 of a paper circle for the mouse's body
A piece of sticky tape
2 small paper triangles for the mouse's ears
A small piece of gift ribbon / string for the mouse's tail
Scissors

Rocket Mouse

Five, four, three, two, one...blast off! We love building and sending this paper mouse-naut into the space...

1. Punch a small hole by the bottom end of the paper for the mouse's tale. Bring both sides of paper together and secure with a sello tape.

Stick on the ears, attach the tail and draw the mouse's eyes.

2. Position the rocket mouse on top of the empty milk bottle and send the mouse to space by squeezing the bottle from both sides with a big bang!
